

Guidance on completing registration form (2024)

Full registration of your cultivar requires a comprehensive description. Below is a list of the characteristics that are important for this purpose. Providing complete data with RHS colour codes speeds up the registration process.

RHS colour codes

Purchase RHS colour Charts:

<https://confirmsubscription.com/h/d/32B7103F69C412E1>

Or use the fans on the website: <https://www.internationallilacsociety.org/wp-content/uploads/2019/12/Lilac-Color-Groups-by-RHS-columns.pdf>

General characteristics

- Height (total length from ground to top of plant)
- Number of flowers/buds
- Ø flower

- petal outside (colour, pattern, colour of veins, margins, spots etc.)
- petal inside (colour, pattern, colour of veins, margins, spots etc.)
- Filament (colour)
- Pollen (colour)
- Style (colour)
- Stigma (colour)
- Stem (length, colour)
- Leaves (colour, shape, length, width)
- Fragrance (if present)

Additional characteristics

For a number of crops, data on the following additional specific characteristics are also desired

Galanthus

- Length of inner petal
- With of inner petal
- Lengt of outer petal
- Width of outer petal

Hippeastrum

- Pedicel (colour, length)
- Number of flowers/buds
- Bract: (colour, length)
- Bracteols: (colour, length)
- Depth of flower

Lycoris

- Ø umbel
- Bract: (colour, length)
- Bracteols: (colour, length)
- Pedicel (colour, length)
- Ovary (colour)

Tulipa

- Macula (colour, margin of macula)

Please send photographs with your registration form showing the flower from all sides. One showing the flower face on, one showing the flower sideways on (or backside of the flower) and one showing the complete plant would be ideal.
